AIRLINE MOBILE APP

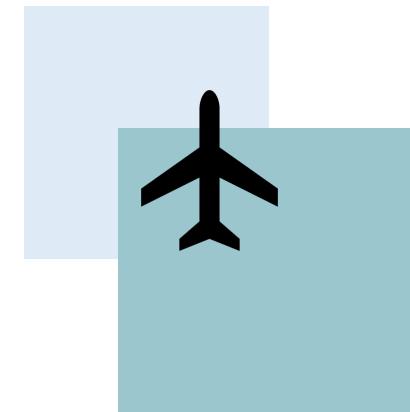

DATE: May – July 2018

CHALLENGE

An airline wished to develop a mobile application that allowed customers the ability to book flights, manage their bookings, and check flight status among other interactions with the airline. The mobile experience was to mimic the operations and flow of the airline's website.

MY EXPERIENCE

- Meetings with stakeholder
- Requirements elicitation
- Whiteboarding
- Creating wireframes
- Product backlog assistance
- Reviewing mockups

AIRLINE MOBILE APP

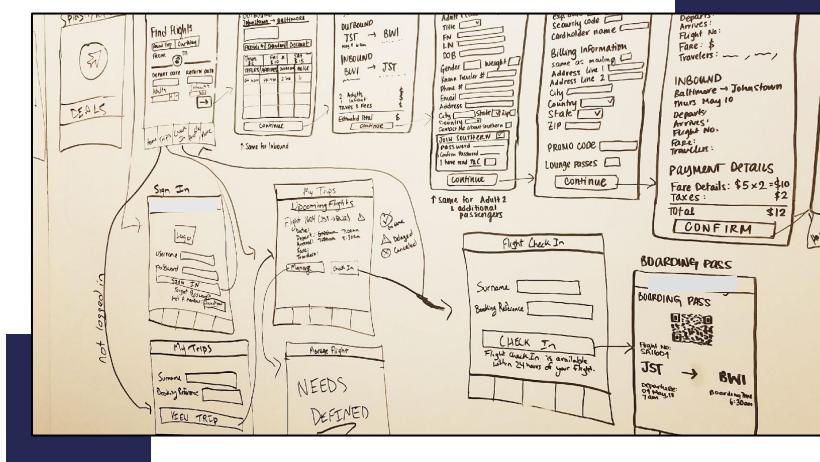

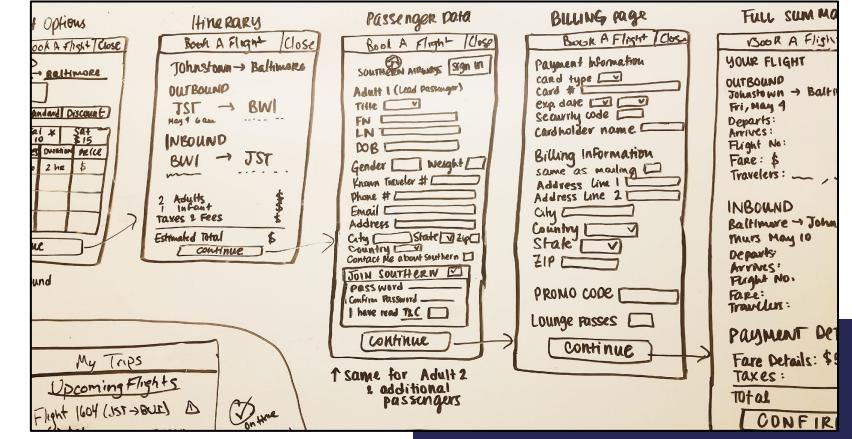

WHITEBOARDING & REQUIREMENTS GATHERING

PROCESS

In various client meetings, I first sought to understand the primary users of this application and the core flows of the existing airline website. I was then able to make sketches with the design team and iterate often according to newly learned information.

For my user research, I...

- studied the airline website
- examined competitor applications
- explored the existing test site
- booked and managed “test” flights to better understand the process

AIRLINE MOBILE APP

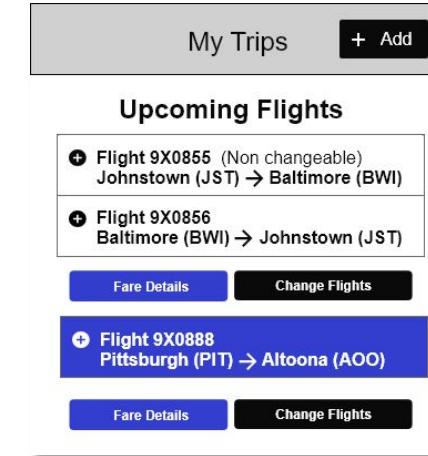

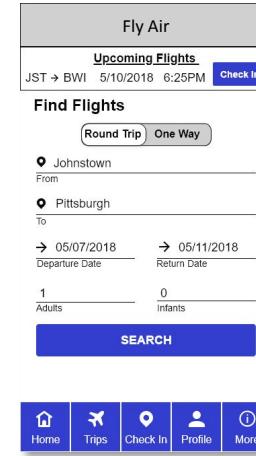

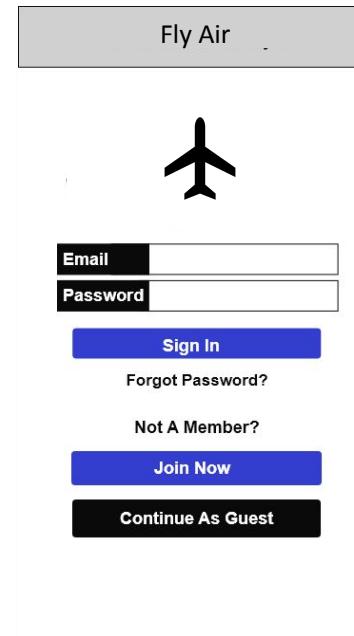

WIREFRAMING

TOOL: Adobe XD

PROCESS

Upon deciding the layout and core functionalities, I wireframed the app screens. The blue on the screens indicates the clickable portions of the design that show the process flow.

After iterations, these designs were sent to the graphic designer for mockup creation. I also noted areas that needed further defining by the client.

The image contains several wireframes of the Fly Air mobile application:

- Boarding Pass:** Shows a boarding pass for John Doe from Johnstown, PA (JST) to Baltimore, MD (BWI). It includes the flight number 9X0855, departure time May 7, 2018, 11:45 AM, and arrival time 12:30 PM. A barcode is shown below the boarding pass.
- Flight 0855 Status:** Displays flight status as 'On Time' with a dropdown arrow. It shows the route from Johnstown, PA (JST) to Pittsburgh, PA (PIT). The flight number is SAE0855, departing at 11:45 PM EDT and arriving at 12:30 PM EDT. The duration is 45 min.
- Check In:** Shows the 'My Booking' section for flight 9X0855. It lists passengers John Doe and Sally Mae, their ticket numbers, and a 'View Boarding Pass' button. It also shows another flight entry for Flight 9X0856 from Baltimore to Johnstown.
- Needs Defined:** A wireframe of the bottom navigation bar with five blue buttons: Home, Trips, Check In, Profile, and More.
- My Booking:** A wireframe of the 'My Booking' section showing upcoming flights from Johnstown to Baltimore and Baltimore to Johnstown.

AIRLINE MOBILE APP

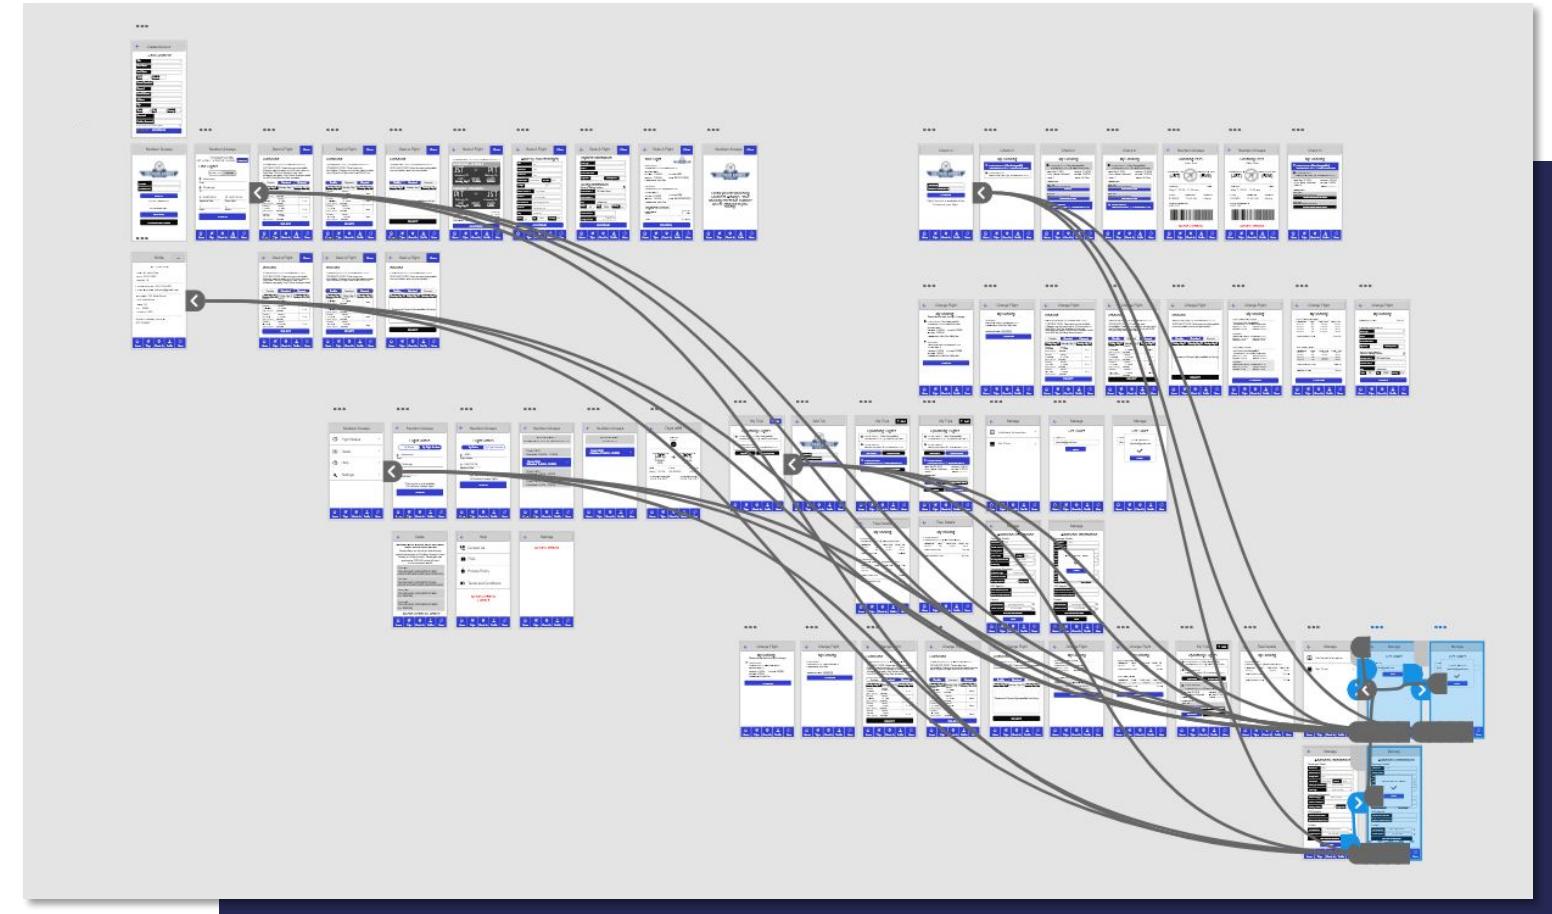

WIREFRAMING

TOOL: Adobe XD

PROCESS

Eventually, the screens were linked together to create a clickable wireflow.

This prototype was published and sent to the client for review. The viewer was able to click through, leave comments, and note specific changes required.

AIRLINE MOBILE APP

BACKLOG CREATION

I assisted in with business documentation including the description of the business rules, epics, and user stories, which were all used to define scope for MVP. Striving for clarity, I wrote the criteria in user-story format and placed the corresponding wireframe screens accordingly.

The wireframe shows two versions of the 'My Trips' screen. Both versions feature a header with 'Upcoming Flights' and a list of flights. The left version shows a flight from Johnstown (JST) to Baltimore (BWI) and another from Baltimore (BWI) to Johnstown (JST). The right version shows a flight from Johnstown (JST) to Pittsburgh (PIT) on May 25, 2018, with passengers and fares listed. Both screens have buttons for 'Edit Details', 'Delete Reference', and 'Add Trip'. A navigation bar at the bottom includes 'Home', 'Trips', 'Check In', 'Profile', and 'More'.

- As a guest who has just booked a flight within or outside of the application, I should not see that flight listed under Upcoming Flights, unless I manually added it in.
- As a member who booked the flight through the application, I want this flight to be automatically listed in the Upcoming Flights page, without having to manually add it in.
- As a member who has had a flight booked outside of the application or by another individual on their behalf, I will not see my upcoming flight unless I manually added it.
- Assumption: A Lead Passenger who adds a flight will see all flight information for all passengers while other passengers who add the flight will need to use the Lead Passengers surname to add the flight to their application and will also see all passengers.
- As a guest or member, I want to be able to view the flight number, flight route, date, departure time, arrival time, class, passengers, and flight status for my upcoming flights.
- As a guest or member, I want the option to check in from the My Trips page.
 - As a guest or member who has a flight that is not within 24 hours, I should not be able to check in, but I should be able to view the time and date of when check in opens.

The wireframe shows a search interface for finding flights. It includes fields for 'From' (Johnstown), 'To' (Pittsburgh), 'Departure Date' (05/07/2018), and 'Return Date' (05/11/2018). It also includes dropdowns for '1 Adult' and '0 Infants'. A 'SEARCH' button is at the bottom. Below the search form is a navigation bar with 'Home', 'Trips', 'Check In', 'Profile', and 'More'.

- As a guest or member, I want the ability to press 'Search' to continue.
- As a guest or member searching for a one-way flight, I want to be able to select my outbound flight from a list of available flights that match my query and then press 'Continue' to continue to the itinerary page.
 - As a guest or member, I want to be able to roll back to previous screens to view or edit my selections during the booking process.
 - As a guest or member, I want to be able to filter my outbound flights by flexible, standard, or discount fare.
 - As a guest or member, I want to be able to view descriptions of each type of fare to help me in making fare type decisions.
 - As a guest or member, I want the option to view the flights and fares of the day before and the day after my chosen date.
- As a guest or member searching for a round-trip flight, I want to be able to choose my outbound flight and my inbound flight before pressing 'Continue' to continue to the itinerary page.
 - As a guest or member, I want to be able to roll back to previous screens to view or edit my selections during the booking process.
 - As a guest or member, I want to be able to filter my outbound and inbound flights by flexible, standard, or discount fare.

The wireframe shows a summary of flight bookings. It lists a flight from Johnstown (JST) to Pittsburgh (PIT) on May 2, 2018, and a return flight from Pittsburgh (PIT) to Johnstown (JST) on May 11, 2018. The summary includes the number of adults (1), infants (0), taxes & fees (\$ 4.40), and an estimated total (\$ 114.40). A 'CONTINUE' button is at the bottom. Below the summary is a navigation bar with 'Home', 'Trips', 'Check In', 'Profile', and 'More'.

- As a guest or member, I want to be able to view an itinerary of my flight selections and total cost prior to booking the flight.
 - As a guest or member, I want to be able to select Continue if my itinerary is acceptable to move to the next step of booking the selected flight.
 - As a guest or member, I will be able to roll back to previous screens to view or edit my flight from the itinerary screen.
- As a guest or member, I want to be able to view an itinerary of my flight selections and total cost prior to booking the flight.
 - As a guest or member, I want to be able to select Continue if my itinerary is acceptable to move to the next step of booking the selected flight.
 - As a guest or member, I will be able to roll back to previous screens to view or edit my flight from the itinerary screen.
- As a guest or member, I want to be prompted to enter the passenger data for each adult and infant in the same way as I would on
 - As a member who is logged in, I want my passenger data auto-populated into the form as the Lead Passenger so that I do not have to fill out all my information again.

MEMORIAL MOBILE APP

DATE: June – September 2018

CHALLENGE

Client desired to develop a web and mobile application that enhanced the way people remembered a loved one. Users should be able to manage, view, and share content with others. Core functionalities included account management, profile creation, content sharing abilities, administrator rights management, and location services.

MY EXPERIENCE

- Meetings with stakeholder
- Defining application users & scenarios
- Requirements elicitation
- Whiteboarding
- Helped to define scope for MVP
- Creating wireframes, mockups, prototype

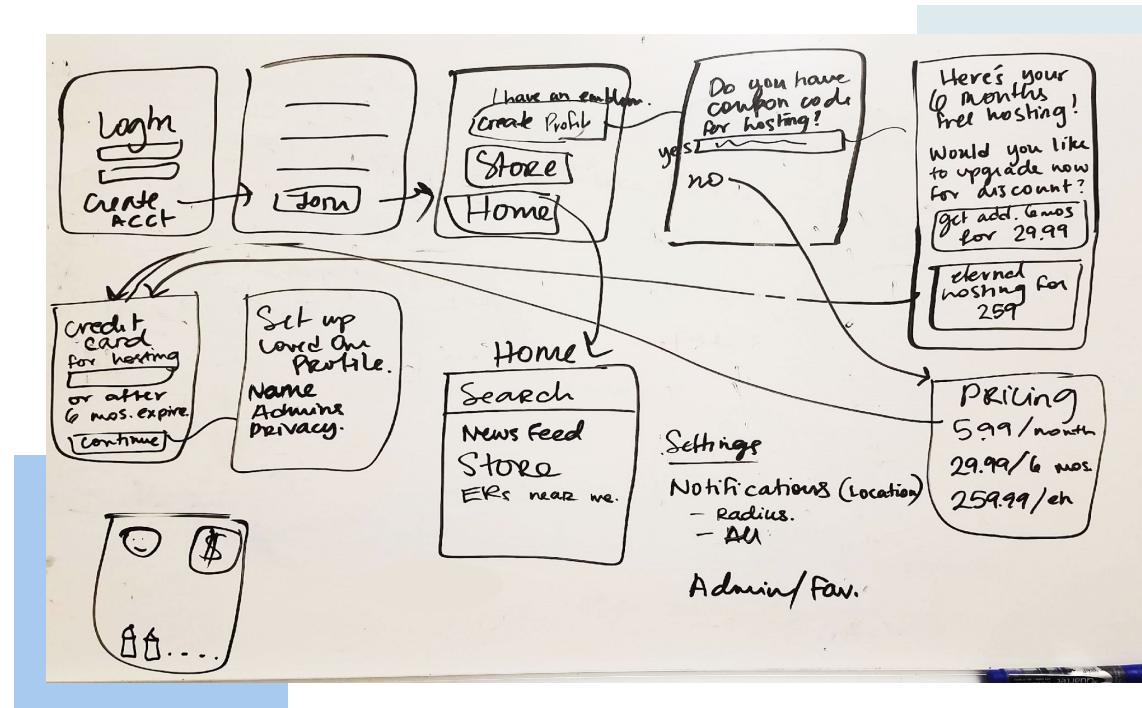

MEMORIAL MOBILE APP

DEFINING SCOPE FOR MVP

A workshop and several meetings with the clients proved to be very useful in identifying the user base and clearly defining requirements for this application. I assisted in defining scope with the team by working with the clients to prioritize core features of the app. With this information, we were able to better plan out the wireframes.

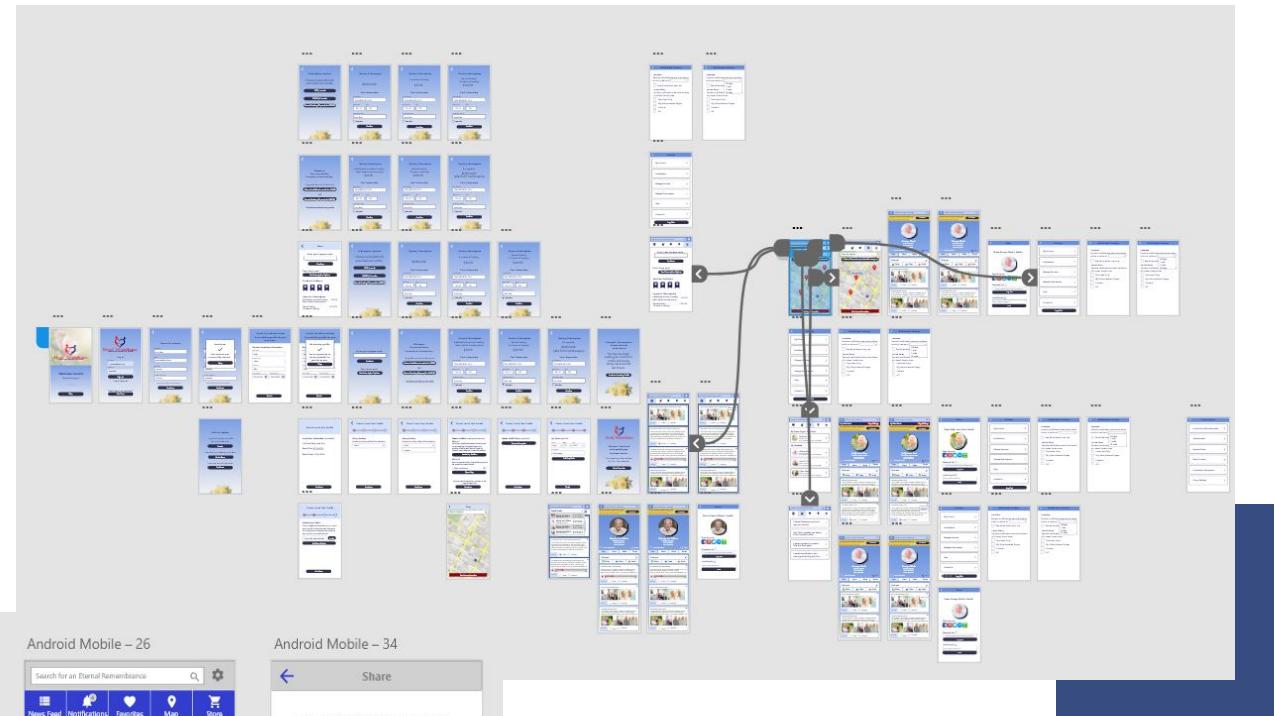

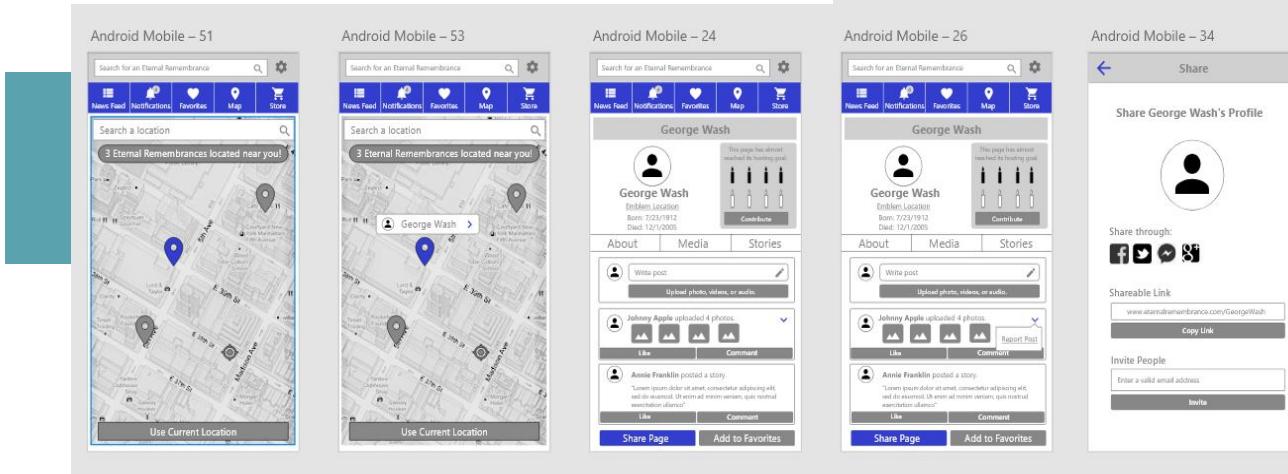

MEMORIAL MOBILE APP

WIREFRAMES

TOOL: Adobe XD

Both the initial and high-fidelity wireframes had clickable sections, so the client was able to review and get a feel of how the app would flow.

MEMORIAL MOBILE APP

INITIAL WIREFRAMES

TOOL: Adobe XD

The wireframes illustrate the initial user flow for the Memorial Mobile App:

- Log In:** Shows the Eternal Remembrance logo and a "Log In" button. Below it, there are fields for "Username" (johndoe@mail.com) and "Password" (*****), followed by "Sign In" and "Forgot Password?" buttons.
- Create An Account:** A "Create An Account" screen with fields for "Full Name" (John Doe), "Email" (johndoe@mail.com), "Password" (*****), and "Confirm Password" (*****). It includes a checkbox for accepting "Terms and Conditions".
- Confirmation:** A modal window titled "Confirmed." with the message "Your account was successfully created." and a "Okay" button.
- Select an option:** A screen asking to "Select an option." with three choices:
 - I want to create a profile for my loved one. (with "Create" button)
 - I want to purchase an emblem. (with "Go to Store" button)
 - I want to explore the site. (with "Continue" button)
- Subscription Options:** A "Hosting Subscription" screen showing "6 additional months of hosting (after initial 6 months expire)" for "\$29.99". It offers an upgrade:
 - Get an 6 additional months for \$29.99
 - OR
 - Eternal Hosting (10 years) for \$259.99It also has a "Continue without upgrade" link.
- Card Information:** A "Card Information" screen for a "Hosting Subscription" showing a card number (1234 5678 9101 1213), expiry date (05 / 21), CVV (123), and cardholder name (John Doe). It includes a "SAVE CARD" checkbox and a "Confirm" button.
- Confirmation:** A modal window titled "Confirmed." with the message "Your payment information has been stored." and a "Create Profile" button.
- Subscription Confirmation:** A "Hosting Subscription" screen showing "Eternal Hosting (10 years of hosting)" for "\$259.99". It states "No upgrade. \$5.99/month (after first 6 months expire)".
- Card Information:** A "Card Information" screen for "Eternal Hosting (10 years of hosting)" showing a card number (1234 5678 9101 1213), expiry date (05 / 21), CVV (123), and cardholder name (John Doe). It includes a "SAVE CARD" checkbox and a "Confirm" button.

MEMORIAL MOBILE APP

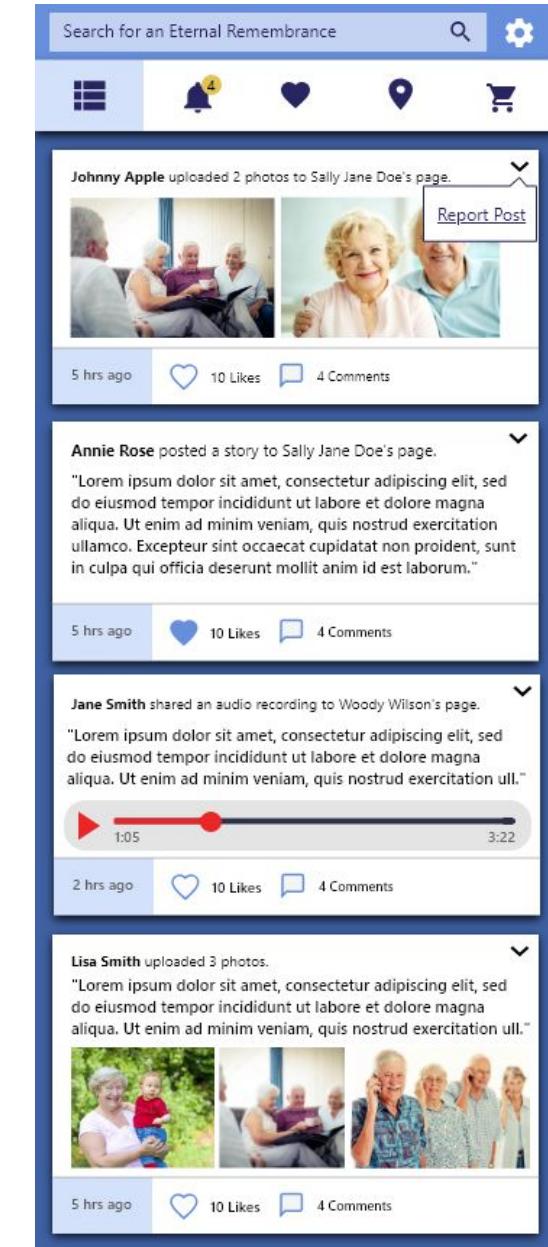

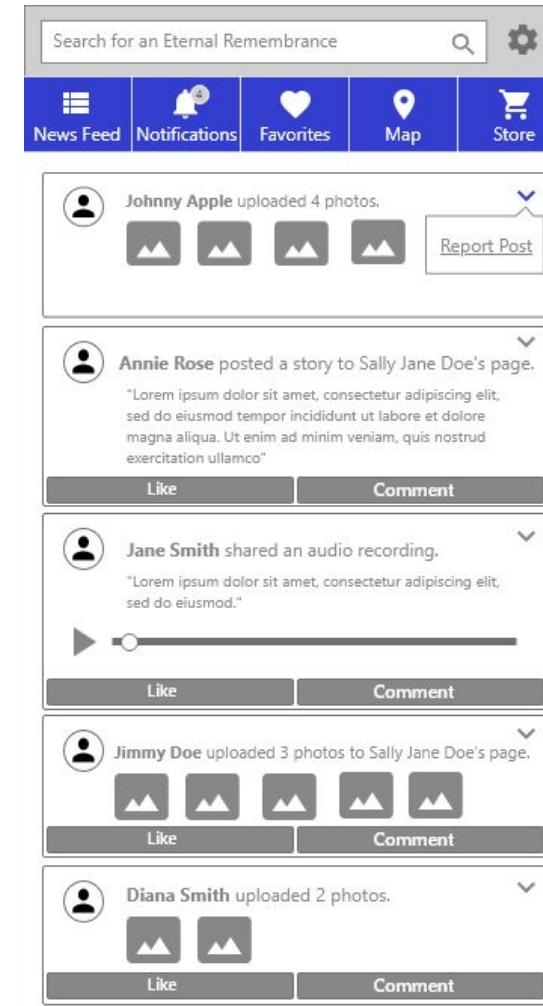

HIGH-FIDELITY WIREFRAMES

TOOL: Adobe XD

PROCESS

After the wireframes had reached a stage in which the client felt we could move forward, I began to develop a high-fidelity clickable wireframe.

I utilized Eternal Remembrance's existing color scheme and kept the client's branding vision in mind.

MEMORIAL MOBILE APP

HIGH-FIDELITY WIREFRAMES

Shown below is the Create A Loved One Profile Wizard, which takes the user through the Create Profile flow.

The wireframes illustrate a five-step wizard for creating a loved one profile:

- Step 1: Privacy Settings**

Choose who this profile will be visible to.
Public
Custom
- Step 2: Privacy Settings**

Choose who this profile will be visible to.
Public
- Step 3: Connect Emblem (optional at this time)**

Method 1
Ensure your location services are turned on and you are standing at the site of where your emblem will be located. Tap the 'Locate My Position' button below to connect this emblem.
Locate My Position

Method 2
Search or enter a location. Drag and drop a pin on the map at the chosen location.
Search a location
Open Map

You may press 'Continue' to come back to this step at a later time.
- Step 4: Upload Profile Picture (optional)**

Browse Computer
- Step 5: Key Dates (optional)**

Month: April Day: 23 Year: 1925
Description: Anniversary
Add Key Date

Each step includes a 'Continue' button at the bottom, except for the final 'Finish' button on the fifth step.

MEMORIAL MOBILE APP

HIGH-FIDELITY WIREFRAMES

The client desired profile pages, a news feed, and the ability to share posts, images, videos, and messages. We began to use Facebook as our guiding concept for these social media features.

SURVEY MANAGEMENT TOOL

DATE: December 2018 – January 2019

CHALLENGE

The company's goal was to develop a web and mobile interface for their survey and decision tool. This tool would assist human resources departments in choosing the best candidate among a pool of job applicants for a position. The clients required the management of surveys, invites, team members, accounts, and results.

MY EXPERIENCE

- Helped to define user roles for the system
- Assisted in whiteboarding
- Clickable Wireframes
- Iterated wireframes frequently upon client feedback

SURVEY MANAGEMENT TOOL

WIREFRAMES

TOOL: Adobe XD

Several whiteboard sketches and iterations lead to this basic wireframe.

MOCKUP 1

FURNITURE CONSTRUCTION WEB LAYOUT TOOL: Adobe XD

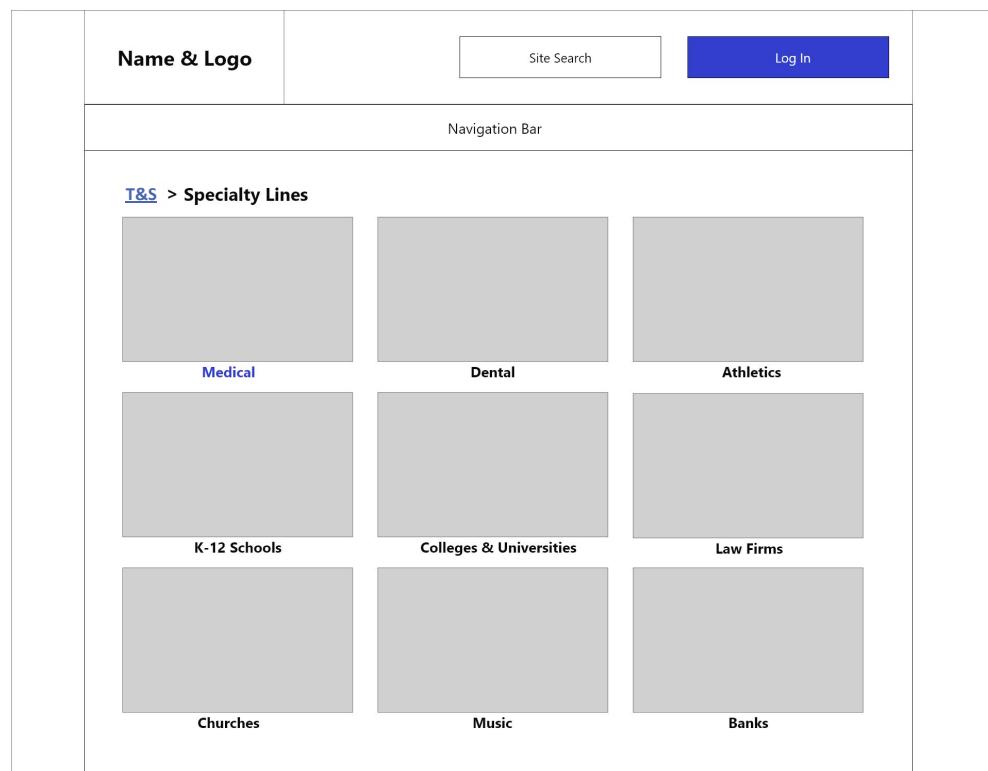

This image shows a wireframe of a website interface. At the top, there is a header with a 'Name & Logo' section, a 'Site Search' input field, and a blue 'Log In' button. Below the header is a navigation bar with a 'Share' button. The main content area has a breadcrumb 'T&S > Base Cabinets'. It features a large gray placeholder image for a product image, a text block about base cabinets, and a 'CAD File Download' button. Below this are navigation arrows and a horizontal scroll bar. A sidebar on the right lists various resources with '+' icons: Resources, Laminates, Edgebanding, Cores, Pulls, Hinges, Drawerslides, and Locks.

This image shows the final design of the T&S Co. website. The header includes the 'T&S Co.' logo, 'Superior Custom Casework', a 'Site Search' bar, and a 'Log In' button. The main content area has a breadcrumb 'T&S > Base Cabinets' and a title 'Base Cabinets'. It features a detailed technical diagram of a cabinet with dimensions and notes like 'Leave 1/4" gap between doors' and 'Push to bottom'. Below the diagram is a 'CAD File Download' button. A horizontal scroll bar with images of various kitchen cabinets follows. The sidebar on the right is identical to the wireframe, listing Resources, Laminates, Edgebanding, Cores, Pulls, Hinges, Drawerslides, and Locks. The footer contains the 'T&S Co.' logo, contact information, and several accreditation logos: FSC, Sustainable Forestry Initiative, and BBB Accredited Business.

MOCKUP 2

FURNITURE CONSTRUCTION WEB LAYOUT TOOL: Adobe XD

The final design is a polished version of the wireframe. It features a dark teal header with the 'T&S Co.' logo and 'Superior Custom Casework' text. A search bar and 'Log In' button are also in the header. The main content area has a teal background and displays the same grid of nine specialty line categories as the wireframe, each with a placeholder image. The footer is a dark teal bar containing the 'T&S Co.' logo, contact information ('Contact Address Phone'), and several accreditation logos: FSC (Forest Stewardship Council), SFI (Sustainable Forestry Initiative), and BBB (Better Business Bureau).

ROADMAP 1

PROCESS

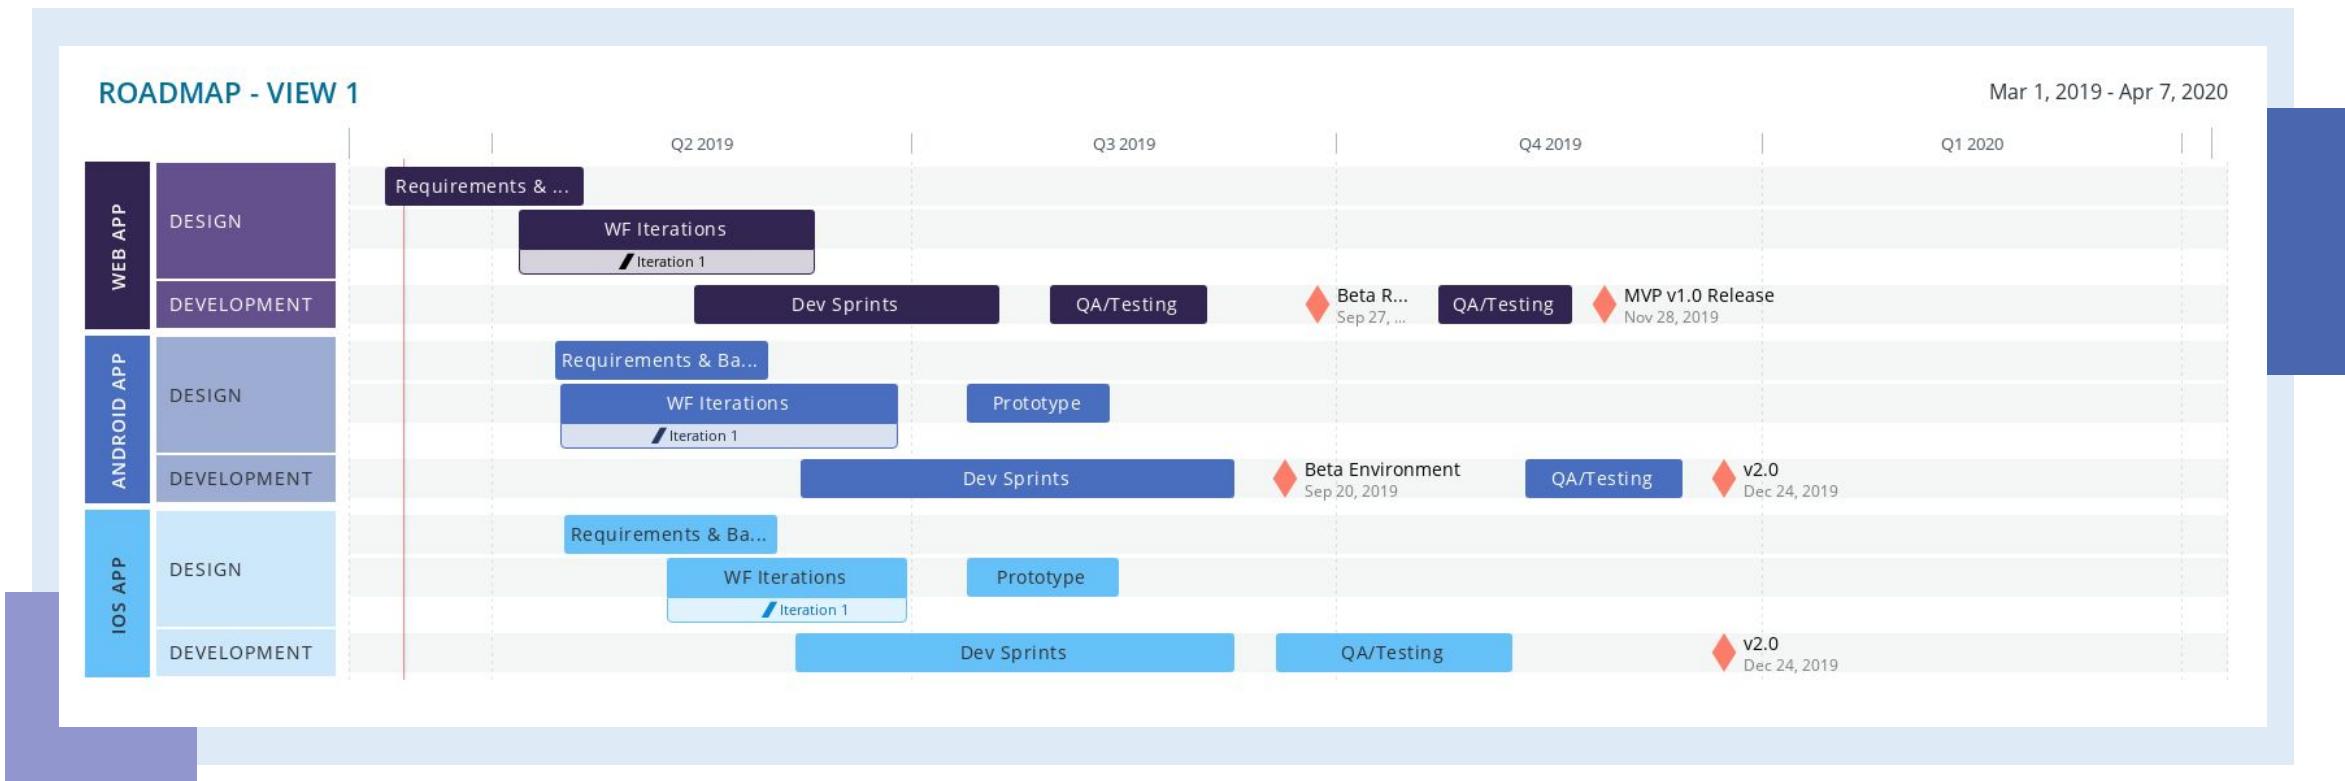

Created roadmap designs based off of a whiteboard sketch. Shown here are four different styles I designed using MS Word.

ROADMAP 2

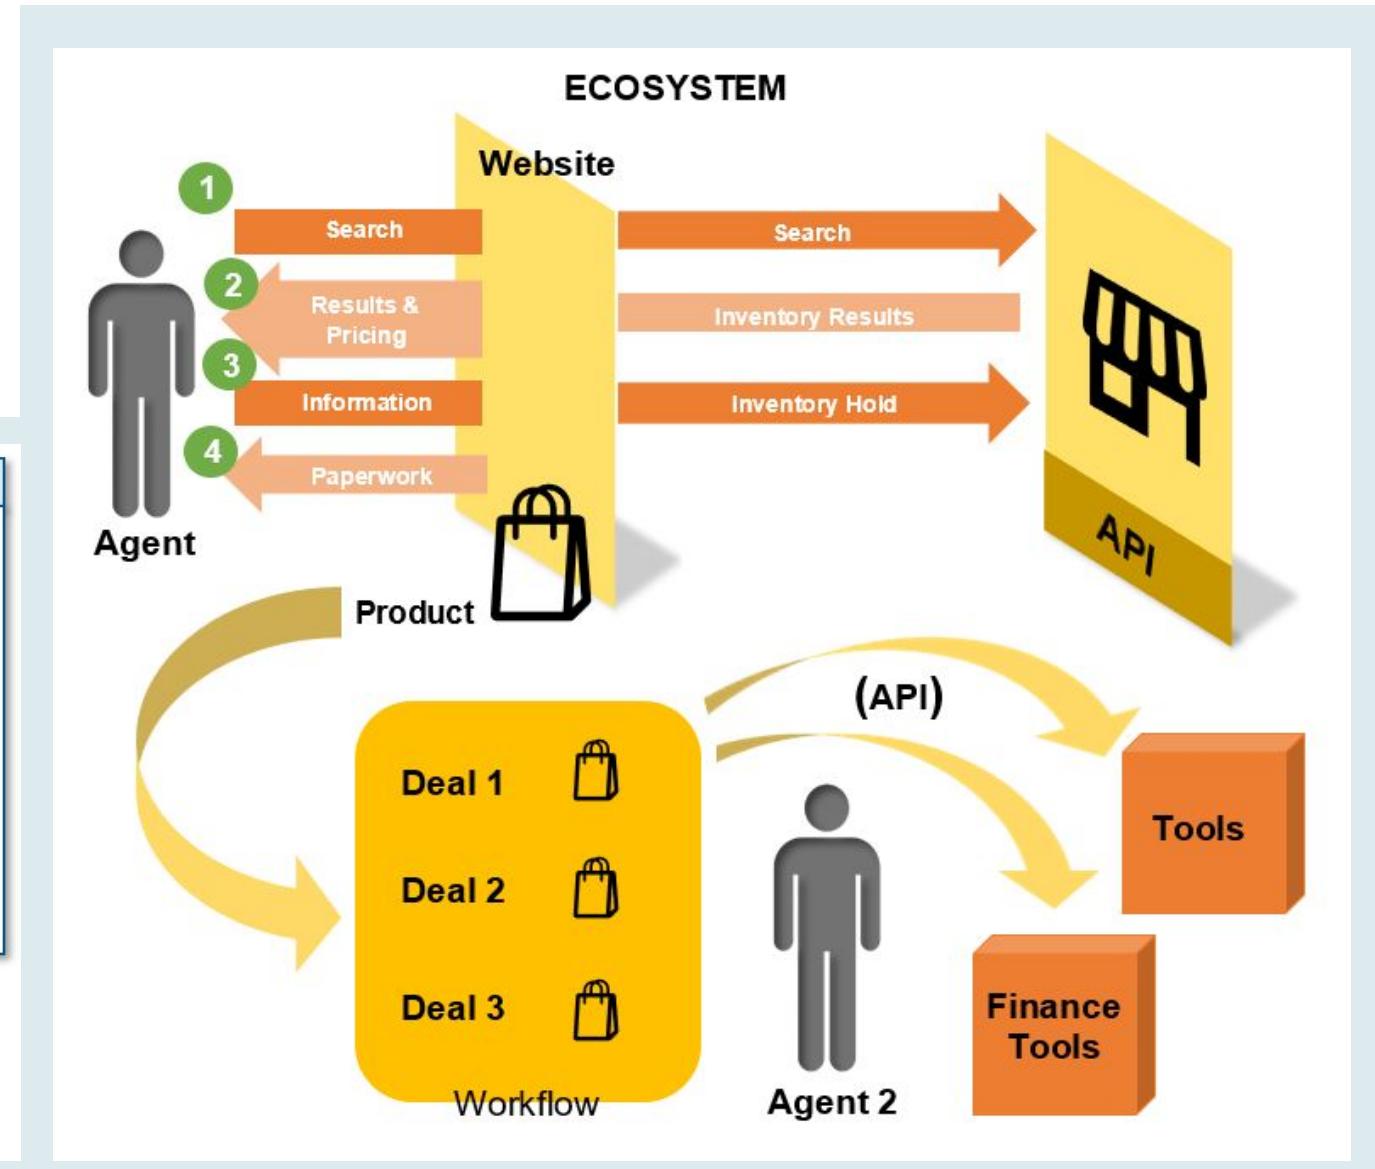

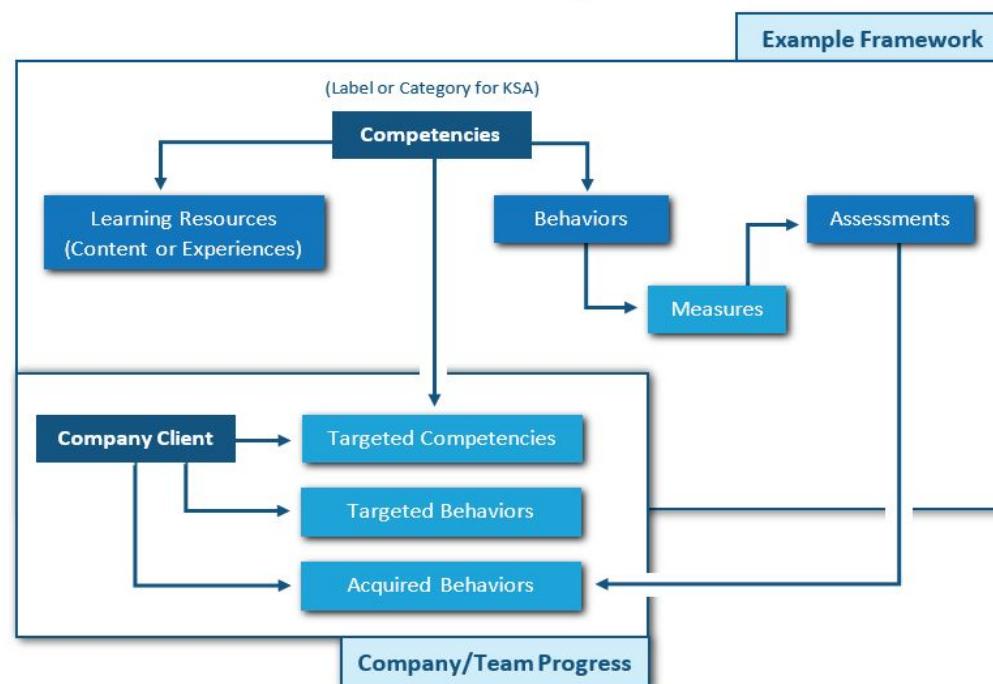

PROCESS

Utilized Roadmunk to create roadmap for Project Management class based off of loosely defined requirements.

DIAGRAMS

Shown here are a few diagrams I digitized from sketch concepts using MS Word.
